

ARAVIND INTI

AWS Data Engineer

aravindinti10@gmail.com | +91 8971740776 | linkedin.com/in/aravindinti

PROFESSIONAL SUMMARY

Results-driven AWS Data Engineer with 3 years of experience designing, developing, and optimizing scalable data pipelines and cloud-based data ecosystems. Proven expertise in Python, Apache Spark, Databricks, and AWS services (S3, Glue, Lambda, Athena, Redshift). Demonstrated ability to deliver production-grade ELT frameworks with 85%+ test coverage, implement Change Data Capture patterns, and architect data mesh solutions for global enterprise clients including Porsche, Bentley and Audi. Recognized with Wall Of Fame And Best Debutant Award (2025) for excellence in Data Engineering and innovation.

TECHNICAL SKILLS

- Languages & Query: Python, SQL, Apache Spark, PySpark
- Cloud Platform: AWS (S3, Lambda, Glue, Athena, Redshift, EMR, Glue Catalog, Kinesis, Lake Formation, SNS)
- Big Data & Processing: Apache Spark, Spark Streaming, Databricks, Delta Lake, Trino,
- Data Architecture: Kubernetes, Data Lake, Data Mesh, Data Warehouse, Delta Lake Architecture
- Orchestration & CI/CD: Argo Workflow, Bamboo, JFrog Artifactory, Bitbucket, Git
- Data Formats & Patterns: Change Data Capture (CDC), ELT Pipelines, ACID Compliance
- Project & Collaboration Tools: JIRA, Confluence, SC3
- Methodologies: Agile, Scrum, Data Governance, Data Quality & Compliance

WORK EXPERIENCE

AWS Data Engineer | Volkswagen Group Digital Solutions India | *Aug 2023 – Aug 2026 (Notice Period)*

- Design and deliver scalable data engineering solutions using Python, Apache Spark, and AWS services (S3, Lambda, Glue, Athena, Redshift), orchestrated via Argo Workflow and Bamboo CI/CD pipelines.
- Architect and implement data mesh model enabling both real-time streaming and batch processing pipelines; built metadata-driven, configuration-based ELT framework for seamless multi-source data integration.
- Engineer incremental data processing systems using Change Data Capture (CDC) patterns, ensuring strict ACID compliance and optimizing throughput via Spark performance tuning.
- Develop production-grade Spark ELT pipelines with 85%+ test coverage, embedding data quality checks, validation layers, and monitoring mechanisms.
- Enable high-fidelity data integration between source and target systems for enterprise clients including Porsche, Bentley and Audi, contributing to the scalability of Volkswagen's global data ecosystem.
- Drive incident response and resolution through proactive root cause analysis and implementation of fault-tolerance mechanisms.
- Lead a project integrating multiple data sources into a unified data lake, enhancing analytics accessibility for global stakeholders.
- Present technical solutions to international clients in Germany, strengthening client engagement and trust.
- Author user stories in JIRA, execute unit and system-level testing, and ensure data consistency across distributed repositories.

KEY PROJECTS

Smart Quality Analytics Platform – *Volkswagen (2023 – Present)*

- Contributed to large-scale batch processing platform enabling daily ingestion of data from diverse vehicle source systems.
- Designed ELT pipelines to support high-volume, high-velocity data processing for quality analytics use cases.
- Tech stack: Apache Spark, Delta Lake, SQL, AWS S3, Python, AWS Lambda, AWS Glue, AWS Athena, AWS Redshift, Bitbucket, Bamboo, Argo Workflow.
- Enhanced data reliability, scalability, and performance to support analytics within Volkswagen's data ecosystem.

AWARDS & ACHIEVEMENTS

- Best Debutant Award – Recognized for excellence in Data Engineering and driving innovation (2025)
- Wall of Fame Recognition – Awarded for outstanding project delivery and strong technical leadership (2025)
- Presented technical solutions to international clients in Germany, representing Volkswagen Group's data engineering capabilities

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology

Swarnandhra College of Engineering and Technology | 2023

CORE COMPETENCIES

Data Ecosystem Management • Data Engineering & ELT Pipelines • Data Warehousing & Analytics • Cloud Integration • Real-time Data Processing • Data Lake Architecture • Data Pipeline Orchestration • Distributed Processing • Data Modeling & Optimization • Data Quality & Governance • Agile & Scrum Methodologies • Performance Tuning • Data Transformation & Integration • Stakeholder Engagement • Software Development
